Sam and Max, Freelance Police! ... are back in season two.

(You can never have enough Sam and Max!!) - and yes, they are just as good in Season2. And if you thought they couldn't go further than season 1... you will be surprised.

Note: You really need to play these games in order. The story builds, characters are introduced, and if you haven't played previous games, you won't understand the backstory.

Hilariously imaginative, well-written, and adorable. Recommended! 9.5/10. This is so much fun. I spent a bunch of time playing it today when I should have been working. This is going to be my lunch hour game for a while to come. Nice job all round. The range of alien designs reminds me of Atari's "Space Duel"; always something new and shiny to shoot and/or be surprised by.. Ok, sooooo. I like it. SO FAR! This game has sooooo much potential. It looks like a game that I would totally spend hours a day on. Like Factorio, Production Line etc. However this game has a good feel to it, like using the pallet jack to move products around your factory, pallet wrapping your outgoing products. Its actually pretty cool. Simple enough but descent graphics, being able to pan the camera around gives you the 3D view. It just has some bugs that hang you up. Havent gotten past the tutorial. You can, just have to be very careful. I restarted the game like 10 times to redo an action or not knowing how to do something. I want to see where this game will go. Devs lets get this game where it needs to be. More content and just a little help with the routing and item interactions. This one will be GOOD!!!!. +

I pretty much liked the game for it's acid colored fun. JASEM is for those who prefer actions to thoughts and like pleasant siffering. The explosions of the big barrels are my favourite!

Though it is written clearly "Discrete with 1 GB VRAM" in the requirements, I tried to launch the game with Intel i5 and 8Gb Ram but with integrated video card (Intel HD 4600). And that was not the best idea indeed. Without discrete video card the game will be laggy, sometimes you won't even see your bullets. So in order not to miss the cool effects and not to spoil your JASEM experience, follow the system requirements! I hope the game will be optimized in the future, so that even the players with lousy pc could enjoy it.. One of the best games for a coffee table multi-touch screen. Up to 12 players is unheard of. I love this for parties. Easy to understand and easy to play. Using it on my Samsung SUR40. Buggy and unfinished. Never been updated. Hate fighting her so much.. Where are all the other players?

. Definitely one of the best rhythm games you can find on Steam, fun/challenging maps that are well mapped with a good variety in genre and nice visuals. A pretty large song selection for how cheap the game is and the dlc adds a lot more!

Recommend to anyone who enjoys or even wants to get into a rhythm game!. Relaxing music and spatial thinking as you tie up 3D models of little wooden carvings.

Resist chanting "Oooooooooooooohm" as you sip your green tea and play. I dare you.

I can not advice this game to anyone, maybe in the future.

At this point it has to many small bugs witch lead to annoying gameplay. But it had potential!

pro's:

- plowing helps
- you can see progress on each field
- orchards
- different animals
- the fields really feel like you've worked on the, traktor slides in the mud

Con's:

- textures seems to pop in and out of sync
- tractors slide of hills and can't back up on hills
- progress resets sometimes while working on field so you have to restart
- animals textures belong in a game 10years ago
- no info what so ever in the store so you have to guess what the euepment is for(EG fruit harvesters)

It's has good potential. Exelling FS15 in a few areaw but falling short in the total picture!. Please! For the love of God Save your money!!!

Dont be fooled by what looks like a good idea, it's ruined by loooooooong wait times. and dumb Ai.

I went into this thinking that the dipllomacy part would be a really fun and nifty part of gameplay. Boy! Was I wrong. It takes 10 turns to do anything diplomacy related and then you really dont get anything from it. No trading no allies just an AI that's going to sit there and wait untill you get bored and declare war on them.

Next complaint. The Ai is a steam roller. No other option. It took me 200 turns to see my first bit of conflict and when I engaged there fleet it had 20 ships in a single tile... NOT FUN... Needless to say they rolled over all my planets and I knew, very safely that I wasted 20 dollars.

Do you have 20 dollars burning a hole in your pocket and 4 hours to spend? Go to the movies..... the game is fantastic, If you are a fan of open world survival pvp games you will like this. It had a bad start but they are actually listening to the community and I've had a great time since I started playing.. This game is hilarious!! My friends and I cracked up while clicking frantically. Love the high energy fun and fitting music. If your looking for a witty fast paced multiplayer game this one is perfect!!. I don't normally write reviews but I think it may help the game and prospective buyers. My expectations were not high I i just stumbled upon this game. I have to say, for an Early Access game it's actually pretty darn awesome!

Yes, it's a bit rough around the edges and not complete yet, and yet it is a wave shooter but its actually quite unique and I own loots of VR games.

What is in the game:

1. Three distinct maps, with differet environments, different paths to defend and different layout. I like the desert town map the most, although its quite difficult. The very first city map is fun too!
2. Three heroes. They are very distinct in gameplay and mechanics.

The mage has four different gesture based spells, gestures are very easy to remember and the game is very lenient about the drawing part. One is a quick-throw fireball, which can be upgraded to explode or set enemies on fire, second one is AOE freeze spell, which can be targeted on the ground and can also be upgraded to have a DOT effect. Third one is an awesome point and release ball of lighting spell, which zaps all enemies in its path and can be upgraded to slow affected enemies. And the ultimate spell is truly a wonder to behold! I will leave this one to you to discover.

The archer is very precise and you can shoot as fast and as accurate as you can. The archer has special arrows, such as a high damage sleep inducing arrow and a cool seeking arrow, which reminds me of the Guardians of the Galaxy :D
The ultimate arrow is pretty cool too:)

The gunner has a semi auto gun, you never run out of ammo but it does overheat which is clearly visible on the top of the steam-pank-esque firearm. Now, to load special ammo and rockets into the gun, you have to physically grab the ammunition from different part of your ingame body and then load it into the gun. The character starts pretty weak, but after few damage and AOE upgrades its becomes really powerful! Another benefit of this class is that you can easily finish off the enemies from afar.

3. The enemies start with regular orcs, which run towards the gate which you have to protect. The orcs also sometimes throw the axe you, which you can either block with your shield (it breaks and then regenerates), step to the side/duck in the real world or teleport to another spot in the same node or to the different node. Then there are orcs that speed up the others, orcs with shields, etc. And then there are also several special enemies too, such as a dragon, which flies straight at you and tries to eat your face. Or the necromancer that resurrects fallen enemies. And then there are also bosses..... I leave them to you to discover!

I just made it to level 14 playing as the archer with 3 mages in my group, was such an amazing experience. I then also soloed to wave 12 and now i'm in the 4th place on the leaderboard!

I hope my review helps people, if you have any questions please ask! And see you in the game!. Spectacular!
Improved from DiRT Rally 1 in every way.

This track alone will ruin you for any other racing sim.

If you thought "can I skip this?", I have bad news for you: you really cannot. While many Codemasters F1 games feel like annual patches for the full price, this Monte Carlo DLC feels and looks like a lot of work went into it. Due to the enhanced driving physics and surfaces of DR2 it plays very differently to DR1. They could not have 'just ported' the 'old' MC stage into DR2.

Whatever you think of their overall DLC policy, I find the price very acceptable. If you decide NOT to buy it, you will STILL be able to PLAY, if you are joining your friends online, who own the stage. But, why on earth would you not buy it?!

10/10

. very good exporter good updates and good community. Nice premise but that's all it is really. Everything is placeholder so there's very little in terms of content and mechanics.

Appears to be abandoned, nice waste of my money :))))). Totally lacking any updates or meaningful improvements. Its been the same for 6 months.. 1-2 hours pure fun!
