1. ****Choose Launch Photoshop from the application menu****. The Photoshop launch window appears, as shown on the left in Figure 9-5, so that you can get to the place where you start learning Photoshop. If your new editing project is on a desktop computer, your application menu looks different. You may see a different Launch Photoshop button.

2. ****From the File menu, choose New to open the Photoshop New dialog box****. The Camera Raw dialog box, which is shown on the right in Figure 9-5, appears. You use the New Image dialog box to create a new image, as explained in the next section.

3. ****Choose Camera Raw from the New menu and then select a preset from the drop-down menu****. The drop-down menu in the top-right corner of the New Image dialog box lets you select the type of file that you want to create. For

the easiest editing, choose Camera Raw (Figure 9-6). For the best results, choose the best mode (Auto or Pro) for your camera. This setting has no effect on the photo when you open it in Photoshop (see the next section). However, if you use the file with other programs, it can help speed up the editing process, although this is usually a matter of personal taste.

How do I use Photoshop Elements? The interface is very similar to the one you're probably familiar with. There are three main panels on the interface: The Layers Panel, the History Panel, and the

Tools Panel. The Layers Panel is where you'll most often work, so it's where you'll begin. You start out by clicking on the Layers Panel and then clicking on the Add Layer button. You'll then be able to make changes to the layer and move it to a different position. The History Panel is where you'll find the old versions of your edits. The Tools Panel contains all of the features of Photoshop. The first thing you'll notice when you open the Tools Panel is the Hand tool. The rest of the Tools Panel is similar to Photoshop, with all of the tools we're used to seeing. You can paint, erase, and paint over and resize and move an object with it. You can use the New document button to create a new document. You can then add a new layer to it. You can access your history and the layers of the 388ed7b0c7
