. **Patch 1.0.1 is out!:**

Greetings, ladies and gentlemen! We had received your feedback, considered it worthy, and now we proudly present you the first post-release patch that brings not very global, but nonetheless rather important changes:

- Edited game localization for several languages;
- Disabled rotation of camera by default (many players were annoyed by it);
- Music is not so often repeating itself now - tracks are chosen not by random, but cyclically, according to the playlist;
- Corrected and balanced volume of all sounds and music;
- Fixed weird game behavior on some screen resolutions;
- Fixed a bug of being able to pause the game while the End of Round window is active (such unnatural occurrence led the game to utter crash);

- 
- Fixed a MacOS bug when multiple clicks could cause a crash of the game.

. **Update 0.5.5.9 Gene changes and access to the clan's inventory:**

- Falling of genes below zero is limited
- Added change of access to inventory of clans
- Added green player online
- Added absence time for the player in the game. **Update 0.35:**
- Balanced plant decomposition rate to 1/3th of total plant growth time
- Plant mutation severity is now determined on plant root spawn
- Plant editor is now using cached plant data, unless structure dependent DNA is changed
- Reduced maximum plant complexity (From: 3/3/6, to: 2/3/6 or 3/3/5 max)
- Inventory state is now tracked and saved
- Persistent inventory slots have been added, accessible as left-most column in Inventory
- Inventory and plant editor windows are now toggled off after picking up object
- Fixed grabbing/cutting single node plants
- Fixed saving/loading free floating plant cuttings
- Fixed held objects not fully rotating in some axes
- Fixed plants generating from scratch in plant editor
- Fixed plants not updating their base spawn position after moving
- Fixed decorations falling out of tank and not colliding with tank sides
- Fixed plant collider center not being part of serialized plant save/data
- Optimized plant spawning by implementing multiple levels of plant data caching
- Optimized plant data management by utilizing pooled arrays instead of dictionaries
- Optimized plant data structure to contain/update less data
- Refactored plant data structure to allow plants caching
- Saves from old versions are now removed on startup

Hotfix 0.35a

- Fixed plant editor crashing game if used to modify default plant when other plants were growing
- Fixed plant editor crashing game if used to modify cutting from growing plant
- Fixed plant editor not rendering some nodes when other plants were growing
- Fixed pooled plant cache not resetting all flags on disable
- Enabled development build as default to simplify debugging

Hotfix 0.35b:

- Fixed plant seeds loading incorrect cached plant data. **Ideology in Friction Update!:**
